Scale Agile to Extend its Benefits Across the Enterprise

In today's fast-paced, rapidly changing marketplace organizations need to deliver high-quality software quickly. Many of your development teams are agile and have experienced competitive advantages such as reduced development costs, enhanced collaboration, increased customer satisfaction rates, and faster delivery of value. Now is the time to scale agile and leverage it further.

CollabNet VersionOne empowers software innovations by helping companies scale Agile across the enterprise, achieve DevOps transformation with Git version control, and align software development and delivery with business objectives through the practice of Enterprise Value Management (EVSM).
